

Shared Haemodialysis Care Leaders Forum

Date: Friday 25th September 2015
Time: 13:15-14:00
Venue: The Lowry Hotel, Manchester

Notes

1.	<p>In Attendance</p> <p>Karen Bahavarand - Leeds Teaching Hospitals Dewsbury Satellite unit Tania Barnes - Sheffield Teaching Hospitals Sarah Boul - Yorkshire and the Humber Strategic Clinical Network Ann Budenberg - Leeds Teaching Hospitals J 48 Joanne Casey – Coventry and Warwickshire Hospitals Matthew Gayles - North Bristol NHS Trust Dr Paul Laboi - York Teaching Hospitals Clair Laidlaw – Epsom and St Helier Elizabeth Lindley – Leeds Teaching Hospitals Dr Bob Lockridge - Central Lynchburg General Hospital, Virginia, USA Julie Murphy – Coventry and Warwickshire Hospitals Maude Mutika – Doncaster and Bassetlaw Hospitals Mary Ngugi - Doncaster and Bassetlaw Hospitals Mercy Ofori Dartey – Doncaster and Bassetlaw Hospitals Dr Ginny Quan - Epsom and St Helier Hospital Gill Womersley – York Teaching Hospitals</p>
2.	<p>Introductions and Purpose of the Meeting</p> <p>Dr Paul Laboi and Tania Barnes conducted introductions and advised the group that this meeting was a follow up to the previous shared care leaders meeting held in Leeds in June 2015. Tania advised the group that the purpose of the meetings was to develop a UK wide network of shared care; sharing the learning from Yorkshire and the Humber out to other units and promoting shared haemodialysis care.</p> <p>Tania advised the group that the meeting would cover three areas:</p> <ol style="list-style-type: none"> 1. Scaling Up (Health foundation bid) 2. Shared Care website 3. Future training ideas
4.	<p>Scaling Up</p> <p>Tania Barnes provided the group with a history of shared haemodialysis care (SHC), the original Health Foundation bid and how undertaking SHC in Yorkshire and the Humber has led to significant culture change within renal units.</p> <p>Tania also advised the group that the SHC project had won some innovation funding and were able to use the BBraun training centre to offer a national training course for SHC. Tania</p>

	<p>advised the group that training had been given to 20 renal units nationally and further course dates were available to staff from across the UK.</p> <p>Paul Laboi advised the group that the teams in Yorkshire and the Humber felt that SHC was the right thing to do for patients and wanted this type of care to be available to all patients and not just patients in Yorkshire and the Humber. Therefore, an application had been put in to the Health Foundation to assist in scaling up SHC nationwide.</p> <p>Paul advised the group that there are 6 renal centres in Yorkshire and the Humber undertaking SHC and if the scaling up bid is successful we will be able to spread SHC to 25 units nationally in a structured way and build an extensive learning and sharing network. Additionally, the project will allow us to collect evidence to fund SHC for the long term.</p> <p>Paul advised the group that collecting evidence is an essential component to the scaling up bid. Paul advised that in Yorkshire and the Humber HHD had increased by 25% over 4 years with SHC acting as an enabler for patients to take this step. Ginny questioned having increased HHD as the outcome measure for SHC, as the ethos of SHC was that patients could do as little or as much as they wanted of their own care. Paul agreed and advised that increased HHD was only one measure and that patient experience was an essential measure that would be captured qualitatively.</p> <p>Paul also advised the group of the essential nature of nurse training in SHC. Tania stated that Matthew Gayles has developed his own training course in Bristol and Andy Corbett has done so in Nottingham. Spreading training and best practice will assist in increased uptake in SHC.</p> <p>Clair Laidlaw enquired if Tania would have the capacity to visit hospitals across the country and provide training as many units have difficulties in releasing staff from the wards to attend training courses. Tania advised that “pop up” training courses had been suggested as part of the scaling up bid but it was essential to understand what worked and what did not work for different units nationwide before embarking on this idea.</p>
<p>5.</p>	<p>Shared Haemodialysis Care Website</p> <p>The website is accessible at http://www.shreddialysis-care.org.uk/. Please review the website and provide suggestions and feedback to Tania Barnes (tania.barnes@sth.nhs.uk) and Paul Laboi (paul.laboi@york.nhs.uk).</p>
<p>6.</p>	<p>Future Training Discussion</p> <p>Tania Barnes advised the group of the developments that have occurred in the nurse training course for shared care. Tania advised the group that she would like to further explore innovation in training and gain ideas from the group of what would work for them with regards to training.</p> <p>The group stated that patient input into shared care training is essential and provides inspiration for patients and nurses to take part in shared care. It was suggested that patient input could be used in pre-dialysis clinics.</p> <p>It was also suggested that with the Transforming Participation in CKD work shared care could be advocated during a patient activation conversation.</p> <p>The group also discussed the youth/transition work, especially the Ready, Steady, Go</p>

	<p>programme and suggested that an adult version of this would be useful for training.</p> <p>Lastly the group discussed developing a care pathway with peer support input from the start of the pathway. It was suggested that patients should be buddied up and receive support from a shared care team member and this would increase participation.</p>
<p>7.</p>	<p>Any Other Business</p> <p>Clair and Ginny from Epsom and St Helier raised issues with implementing shared care in privately owned units. They expressed an interest in understanding the contracts held by other hospitals with private satellite units to see if there was any information contained that could assist with contract amendments or KPI's to ensure all patients have access to shared care.</p> <p>Tania Barnes advised that in Hull, which has privately owned satellite units, there is an excellent shared care programme in place. Sarah Boul is to investigate if Jackie Limon from Hull could contact Ginny to discuss contractual agreements and shared care in private units.</p> <p><i>ACTION: Sarah Boul to contact Jackie Limon regarding shared care in Hull.</i></p>
<p>8.</p>	<p>Future Plans & Meetings</p> <p>No future dates were confirmed at the meeting. However, when the outcome of the Health Foundation Scaling Up bid is known a meeting will be convened.</p> <p>For any questions or further information please contact Tania Barnes (tania.barnes@sth.nhs.uk), Sarah Boul (Sarah.Boul@nhs.net) or and Paul Laboi (paul.laboi@york.nhs.uk).</p>
