Introduction
1 in 5 hospital patients

1 in 10 nursing home residents

The Hospital at 4am by Douglas Manry
Over half of people experiencing delirium have dementia.
Delirium can lead to dementia
Delirium can accelerate deterioration in dementia.
Delirium doubles the likelihood of long-term care in an older person
Delirium doubles the risk of death in older people
Delirium can be terrifying.
Delirium is often misdiagnosed

The Plain Dealer, Andrea Levy
Treatment, support and care of people experiencing delirium is poorly understood in general medical practice.
